

Practical-3

Generation of Reproducible and Interactive ML Project.

Task 1: Create the Github repository for the house rate prediction project created in practical 2.

Task 2: Integrate your repository with the binder to make your project interactive. (Hint: refer to the following link for the steps: (<https://mybinder.org/>))

Build and launch a repository

GitHub repository name or URL

GitHub

Git ref (branch, tag, or commit)

HEAD

Path to a notebook file (optional)

File ▾

launch

Copy the URL below and share your Binder with others:

Expand to see the text below, paste it into your README to show a binder badge: [launch](#) [binder](#)
